Certainly! I'll create a 3-week plan for you to complete this Scrimba Frontend Developer course.
I'll break it down week by week, considering the time estimates provided for each module.
Here's a suggested plan:

Week 1:
1. Web dev basics (6.2 hrs)
2. Making websites interactive (9.7 hrs)
3. Accessible development (1.6 hrs)
4. Essential CSS concepts (4.5 hrs)

Week 2:
1. Essential JavaScript concepts (10.6 hrs)
2. Responsive design (4.6 hrs)
3. Code reviews (0.85 hrs)
4. Working with APIs (7.6 hrs)
5. User interface design (2.5 hrs)

Week 3:
1. React basics (13.6 hrs)
2. Advanced React (13.3 hrs)
3. Getting hired (5.1 hrs)

To create this plan in Google Calendar:

1. Open Google Calendar
2. Create a new calendar called "Scrimba Frontend Course"
3. For each week, create events for each topic:
   - Set them as all-day events
   - Use the topic name as the event title
   - In the description, include the estimated hours and any notes
4. Color-code the events based on difficulty or topic type
5. Set reminders for yourself to stay on track

Some tips for your study plan:

1. Allocate more time for complex topics like React
2. Try to complete 3-4 hours of study each weekday
3. Plan for longer sessions on weekends if possible
4. Include short breaks between topics to avoid burnout
5. Review your progress at the end of each week and adjust if necessary

Remember to be flexible with your schedule and adjust as needed based on your learning pace
and other commitments. Good luck with your studies!
